

DeconWasher™ Pro S

Intuitive touchscreen control
The DeconWasher™ Pro S combines user-friendly operation with efficient cleaning performance in a compact design. Its intuitive resistive touchscreen gives you full control of the machine. The modern interface is inspired by the easy-to-use analog control panel of the Solo Rescue. Start a wash program with a single tap and follow its progress through the progress bar.

You can easily adjust wash and rinse temperatures, detergent concentration and rinse volume. The display also shows the number of completed programs since the last water change and provides water change and service notifications.

Powerful cleaning performance
The smart design ensures powerful cleaning performance through high water flow and rotating wash arms equipped with specially designed nozzles to effectively clean and decontaminate your equipment. The generously sized rinse system further helps reduce dangerous soot particles and residue.

The DeconWasher™ Pro S also offers flexible disinfection options through its rinse system. By adding disinfectant as a rinse aid, you can choose to include disinfection directly after the regular wash cycle or create a separate program dedicated to disinfection. The latter option allows your equipment to receive a regular fresh water rinse followed by an additional disinfection cycle.

Technical Specification

Power supply	208 V / 240 V single-phase, 50/60 Hz
Fuse	10–20 A
Water supply	Cold & hot water, 0.5–10 gpg (0.5–10°dH)
External dimensions H x W x D	**Closed:** 26.8” x 31.1” x 68.2” (680 x 790 x 1732 mm) **Open:** 26.8” x 42.5” x 74.8” (680 x 1080 x 1900 mm)
Weight (empty machine)	287 lbs (130 kg)
Wash tank volume	8.5 gal (32 liters)

*For best cleaning performance we recommend 3–7 °dH.

WARNING! Rescue Intellitech disclaims any and all liability for any damages or injury to persons, property or otherwise resulting from (i) inaccurate or insufficient instructions by a PPE manufacturer with respect to the use of our machines, (ii) use of a decon washer in a way that does not correspond with the washing instructions of the relevant PPE manufacturer, or (iii) where no such instructions exist, use of the machine without the user contacting the PPE manufacturer to receive such instructions or information.
