

LIGHTWEIGHT WATER RESCUE TELESCOPIC REACH POLES

The reach poles provide a rapid, agile method to reach a conscious in-water casualty. The poles can equally be used to retrieve items from the water.

The lightweight, durable carbon fibre make it very easy to operate at such lengths. Pole sections cannot be fully separated, each section has a clamp that unlocks a section and enables easy adjustment for fast extraction and retraction.

On the tip of the pole is an aluminium bayonet fitting for use with the poles quick-release accessories.

POLE FEATURES

- Pole material: carbon fibre
- Clamps material: reinforced resin
- Attachments: 316 stainless steel
- Rubber base
- Quick/easy to attach accessories
